1356. Sort Integers by The Number of 1 Bits

Easy

882

40

Add to List

Share

You are given an integer array `arr`. Sort the integers in the array in ascending order by the number of `1`'s in their binary representation and in case of two or more integers have the same number of `1`'s you have to sort them in ascending order.

Return *the array after sorting it*.

Example 1:

Input: `arr = [0,1,2,3,4,5,6,7,8]`

Output: `[0,1,2,4,8,3,5,6,7]`

Explantion: `[0]` is the only integer with `0` bits.

`[1,2,4,8]` all have `1` bit.

`[3,5,6]` have `2` bits.

`[7]` has `3` bits.

The sorted array by bits is `[0,1,2,4,8,3,5,6,7]`

Example 2:

Input: `arr = [1024,512,256,128,64,32,16,8,4,2,1]`

Output: `[1,2,4,8,16,32,64,128,256,512,1024]`

Explantion: All integers have `1` bit in the binary representation, you should just sort them in ascending order.

Constraints:

•

`1 <= arr.length <= 500`

•

`0 <= arr[i] <= 104`
